## Description of Workshop:

How has the scope of teaching, learning, and leadership changed in the last 30 years? Even the last 10 years--since the year 2001? What tools are available for free that we can in turn use to be more productive and relevant in our schools? This workshop will assist you in developing a vision and philosophy for 21st century leading and learning. You will explore some valuable websites and resources that are being used successfully by schools around the world to engage stakeholders. You will leave with an ongoing global learning network to stay up-to-date and engaged in life-long learning for you, your school, district, community, and most of all, your students.
